### **SECTION 2.0 – LOAD RATING SUMMARY**

The bridge is currently posted for reduced load carrying capacity. Load posting signs were observed at bridge approaches. Based on visual observations at the time of this inspection, there appears to be no immediate signs of overstress or increased distress for the bridge that would affect rating calculations since the last inspection report dated October 18, 2019 by Nagamine Okawa Engineers, Inc. The most recent load rating was performed on December 3, 2019 by Nagamine Okawa Engineers, Inc. See the following load rating summary sheets.
