

SPECIFICATIONS

The Contractor must be capable of providing delivery of the following products:

- 1.1 Provide four (4) deployable and moveable ballistic glass partitions made of clear glass which can be seen through.
- 1.2 These partitions must be moveable, free standing, and at least twenty four (24) inches wide and at least seventy two (72) inches tall standing vertically.
- 1.3 These partitions must provide ballistic protection to surpass set forth in UL752 Level 8, NIJ0108.1 Level III, and EN1063 Level BR6. This Ballistic Glazing shall withstand six (6) rounds of .308 in a one square foot sample, utilizing a FMJ M80 projectile with a mass of 145 grain (9.6 gram) traveling at 2780 feet/second (847 meters/second) and delivering an impact of 3444 Joules of Energy (each round) with a momentum of 8131 kg m/s.
- 1.4 These ballistic panels shall be mounted to a metal frame on all sides, to the front of the panels, and to the back of the panels. The metal frames that hold these ballistic panels shall have a minimum of four (4) wheels to safely support these panels and allow for easy movement of these panels. These wheels for these ballistic panels shall have the option of a locking position when not needed to be movable.
- 1.5 It is acceptable and favorable to have these individual ballistic panels to be able to be fixed together if required.
- 1.6 These four (4) ballistic panels as described above should be delivered to the State of Hawaii Judiciary located at 417 South King Street, Honolulu, Hawaii 96813, for less than \$25,000.00 by August 31, 2023.
- 1.7 The sizes of these four (4) ballistic panels can vary from one another to meet the pricing requirement.
