Delivery Point

DOFAW-Hawaii District
19 East Kawili Street,
Hilo, HI 96720

Description of trap:

- Targets feral pigs
- Non-guillotine style
- Large capacity: Minimum size of 18ft and not exceeding 22ft in width or diameter. Minimum height of 4ft and not exceeding 6ft.
- Made of lightweight, strong, UV protected net material
- Compact
- Uses t-posts for set up
- Net must have a seam or available opening to allow for trailering of captured pig or to allow for setting the net around vegetation
- Easy and quick set up on uneven forested or lava rock terrain
- Able to be transported and assembled by one person
- Repeater style trap with continuous capture when set. Capable of capturing multiple pigs when set without requiring it to be reset after first capture.

Figure 1: Example of Pre-approved trap style

Figure 1 is an example of Pre-approved trap style. Supplier of a different style of trap must submit photo and specification sheet to Specifications Contact for pre-approval before COB April 17, 2023. Offer without pre-approval will not be accepted and will not qualify for award.

Purchase is estimated to be 24 units.

Offer shall include all applicable tax and delivery charges.

Vendors must be HCE compliant to qualify for selection.
