## 1. INTRODUCTION

The State of Hawai'i, Department of Accounting and General Services (DAGS), Office of Enterprise Technology Services (ETS), formerly known as Information and Communication Services Division (ICSD) owns and operates radio facilities statewide. The State radio facilities support microwave communications and land mobile radio communications systems used by State, federal, and county agencies. Many of the State's radio facilities are located at remote areas that require the use of a four-wheel drive (4WD) vehicle to safely access the facility. Because these facilities house and support mission critical systems used to support life, health, and safety, ETS has decided to award this work to a single entity to ensure that security procedures are followed in a uniform and responsible manner and that all work is done in a safe, consistent, and reliable manner.

## 2. BID SPECIFICATIONS

### 2.0 Overview

Service provided by the successful Offeror for this contract, in accordance with the specifications herein, includes the routine upkeep of grounds and property so that areas within and around radio facility boundaries are kept neatly groomed and cut back to provide a clean, neat and safe work environment. As part of this work, the successful Offeror shall trim unwanted vegetation and remove the trimmings from the site and dispose of them in an environmentally appropriate manner. Grass Cutting work includes but is not limited to trimming and removal of unwanted vegetation. Building maintenance services includes, but are not limited to: cleaning, rubbish removal, provisioning of supplies as specified, replacement of light bulbs, maintenance of door seals and threshold barriers to keep out insects, and lubrication of door locks and hinges. Building maintenance also includes miscellaneous tasks such as removal of debris from building roofs where specified and occasional touch-up painting. Brush clearing and fire break maintenance services are required at certain locations to enable vehicle passage and/or provide a clear area to minimize wildfire threats to facilities.

All labor, wages (both regular and overtime), personnel travel costs, per diem, parts, materials, supplies (both required by this specification and those used by the Offeror), consumables (such as, but not limited to, light bulbs and lubricants), tools, equipment, safety gear, costs for storage, transportation, shipping, supervision, access fees, inspection fees, and taxes as required to accomplish the maintenance activities described herein shall be included in the fixed price bid.
