Skandia

Skandia* is a plastic two piece (server and cover) foam insulated meal delivery system that uses the thermal zone principle (heat retention within the menu item cavity). Skandia is available in designer colors.

STANDARD FEATURES:

- Available with full or partial cover
- Expanded wing area to accommodate more food or beverage items
- Works well for on premises and satellite service
- Uses permanentware (China and Alacite) or disposables
- Accommodates a full select menu
- Meals are delivered on flat bed or denested carts
- Compartmental design
- Foam insulated server and cover for heat and cold retention
- Walled cavities for reduced spillage and stationary dish placement
- Requires no additional energy to retain heat
- Easily distinguishable cavities for quick and easy tray assembly
- NSF listed

*Nested Height is the height of the outside dimensions of individual servers and covers when stacked in a multiple set. The server full cover combined height is 4.2". The server/partial cover combined height is 3.9".
