Agriculture Spray Unit HIePro Solicitation

We need one (1) agriculture spraying unit with following features:

- Tank 50 gallon
- Gas powered engine same or equivalent to 5.5 HP GX160 series Honda engine
- Diaphragm pump – 4 gpm, or higher
- Hose reel and hose that is at least 25'' and 3/8" internal diameter
- Mounted on aluminum frame with two (2) pneumatic type tires that allows unit to be hand pulled or towed behind ATV. The holding tank should be secured to the unit so that it can handle a reasonable amount of off-road terrain without shifting when full. The unit should come complete with wiring to attach to vehicle battery for external power if needed.
- Spray gun/nozzle with trigger appropriate for the size and length of hose with an extension.

Please provide images of the sprayer in offer if possible. Our agency understand images are just a representative view of the unit and not the exact unit. Images will be used to provide reference to evaluation team for size and scope.
