

1. **As the contract period of performance is limited to under 6 months, can you please explain if there are expectations of data collection across multiple time periods during this scope?**

OMCCR expects only one-time data collection through surveys to inform predictive models and that programmatic data will be gathered from the past six (6) years that the dispensary licensing program has been active for its assessment.

2. **Is it assumed that the proofer should have historical data for purposes of prediction modeling?**

The vendor shall determine whether historical survey data is required for their predictive modeling. Historic data of the program can be made available to the vendor as needed and appropriate.

3. **Does OMCCR have some historical data to utilize in relation to the goals stated?**

As stated above, OMCCR can provide anonymized historical data regarding medical cannabis patients from the length of the program. OMCCR can also provide data from the seed to sale system.

4. **Is it assumed that some impact assessment questions or long-term cost associations may be narrative based in addition to data informed?**

Yes

5. **Does OMCCR have the ability to provide the medical cannabis supply data from the seed-to-sale system?**

Yes, OMCCR can provide anonymized seed to sale data for indicators identified by the vendor as required for the predictive modeling or dispensary licensing program assessment.

6. **Can a proofer bid if currently working on achieving compliant status per section 1.8D ?**

Yes

7. **Is subcontracting allowable?**

Yes. However, the bidder will have to handle all contracts and business requirements for the subcontractors.
