

TRASH BIN & CARCASS DISPOSAL FOR 2025 AXIS DEER STATE HUNT

SEASON TOTALS:

TOTAL BINS REQUIRED (MINIMUM AMOUNT GARAUNTEED TO UTILIZE): 21

POTENTIAL EXTRA ON CALL BINS (WILL BE PAID ONLY IF UTILIZED): 17

MAXIMUM POTENTIAL BINS (TOTAL GARAUNTEED BINS + ALL POTENTIAL EXTRA BINS): 38

Trash bins for carcass disposal for 2025 Axis deer hunt & removal/disposal services to Maui County landfill.

Vendor will provide trash bins of approx. 3 cubic yard capacity or similar to the hunter check station located at **917 Fraser Avenue, Lanai City**. Vendor will haul away & dispose of carcasses at Maui County landfill. Vendor will be responsible for all fees associated with disposing carcasses at the landfill.

Vendor shall be responsible for the following:

- 1.) Delivering 1 trash bin on the requested start date of each hunt by 7:00AM
- 2.) Removing 1 bin on the Monday following each hunt by 7:00AM
- 3.) Checking the bin daily during the hunting sessions to see if it needs to be hauled away and replaced with an additional bin for the weekend. See attached schedule for hunting days and bin delivery/check/removal. Determination if an additional bin is needed will be based on the following:
 - A.) Enough space in bin
 - B.) Smell of carcasses & direction of wind
 - C.) Any maggots present

Due to the nature of the services requested, the frequency of removal and number of bins needed is unpredictable and may change week to week. Weather and hunter success rates among other factors vary each week which will contribute to the variability of the number of bins utilized throughout the season. The location of the bins at the hunter check station in Lanai city is in a residential neighborhood, so inspecting the bins daily throughout the hunting sessions for capacity, smell, and maggots is crucial to maintain sanitary conditions for neighboring residents. Communicate # of bins used each week and any questionable replacements with Lanai Wildlife Technician V. DOFAW Staff does not work on weekends and won't be monitoring bins on Saturdays and Sundays, so it is critical that the vendor inspects bins for potential replacement. Wildlife Technician V. can be reached by cell phone in the event there are any questions or concerns with replacement bins. Bag limit for the 2025 axis deer hunt is 1 axis deer and 2 ewes per hunter.

Bids should be entered as per bin cost, so a PO can be made for maximum potential bins that may be needed for the 2024 Axis deer season. PO amount will not necessarily equal amount paid to vendor. Vendor will receive payment for the number of bins that are utilized. Invoice must be submitted with actual number of bins utilized for appropriate payment.
