

Addendum 2

DOFAW-KAWAIKINI-FENCE MATERIALS-26

This addendum answers questions posed by offerors:

Question: “for product #4, the horse panel is requested at 3' high, could it possibly be 5' high instead? Because 3' seems very low in height. Most comment horse panel size is 60” high 4x2 6ga x 16’ can this be acceptable.”

Answer: No, it is to be used over the ground as a skirting in swampy sections, not as a vertical fence. It must be a minimum of 36 inches tall by 16 ft long.

Question: “for product #10, High-tensile smooth wire. Does it refer to the High tensile barb-less wire (1320’ roll)?”

Answer: Yes that sounds the same. The wire we are requesting is barb-less high tensile wire and that roll size is correct.

Question: “for product #17, Arrow Brackets for 2 3/8” S40 (for Brace Connections) by any chance you have picture or drawing on these brackets?”

Answer:

The following changes are made to Item #3:

FROM: Deer Mesh Roll (used for second tier of Kawaikini main fence) – 6' tall x 100' heavy duty deer fence, 2x2 mesh, ASTM tested & certified to a minimum 700 lb. breaking load. Constructed of carbon black UV-stabilized polypropylene plastic, life expectancy-15 years. Deer Busters or equal product.

TO: Deer Mesh Roll (used for second tier of Kawaikini main fence) – 6' tall x 330' heavy duty deer fence, 2x2 mesh, ASTM tested & certified to a minimum 700 lb. breaking load. Constructed of carbon black UV-stabilized polypropylene plastic, life expectancy-15 years. Deer Busters or equal product.
