

Contractor Requirements: Due to the technical complexity of the build the Contractor shall be a Whelen Engineering WEVT certified distributor (certification will be verified with the Whelen RSM) with a permanent physical location in Hawaii. The vehicle(s) shall be available for inspection by DLE OIC (officer in charge) project manager during the build process. The contractor shall have drive up warranty service available during normal business hours and be available for off-hours service if the need arises. The warranty period shall, at minimum, match the manufacturer's warranty for the provided product(s); and the contractor shall guarantee the integrity of the installation for the service life of the vehicle.

The contractor shall furnish and install a Whelen C399S CORE-S with CCT5 Handheld controller, SA315 speaker, and mounting bracket. Whelen FST WeCanX DUO (5) head red/white on driver's side & (5) head blue/white on passenger's side. Whelen RST WeCanX DUO (8) head tray consisting of (4) red/amber on the driver's side & (4) blue/amber on the passenger's side shall be mounted. The contractor is responsible for selection of the Whelen mounts that most closely match the GOV. Modification to the included brackets and/or fabrication of new brackets will be necessary. Metal shall be cut/bent/welded as needed. Metal shall be coated to prevent corrosion. Completed installation of the Inner Edge assemblies in each vehicle shall be "as intended" by the manufacturer with minimal to no lighting "flashback" to the vehicle occupants. Final acceptance will be at the discretion of the officer in charge. Any damage to the vehicle by the contractor during the installation shall be repaired at the expense of the contractor. Button assignments, siren tones, and flash patterns shall be approved with the OIC before final programming.
