Skandia

Skandia* is a plastic two piece (server and cover) foam insulated meal delivery system that uses the thermal zone principle (heat retention within the menu item cavity). Skandia is available in designer colors.

*Nested Height is the height of the outside dimensions of individual servers and covers when stacked in a multiple set. The server full cover combined height is 4.2". The server/partial cover combined height is 3.9".

STANDARD FEATURES:

- Available with full or partial cover
- Expanded wing area to accommodate more food or beverage items
- Works well for on premises and satellite service
- Uses permanentware (China and Alacite) or disposables
- Accommodates a full select menu
- Meals are delivered on flat bed or denested carts
- Compartmental design
- Foam insulated server and cover for heat and cold retention
- Walled cavities for reduced spillage and stationary dish placement
- Requires no additional energy to retain heat
- Easily distinguishable cavities for quick and easy tray assembly
- NSF listed
